DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 7, 8, 10-13, 15-18 and 25-38 are allowed.

The following is an examiner's statement of reasons for allowance: none of the prior art of record appears to teach, fairly suggest or render obvious the invention of claims 1, 7, 8, 10-18 and 25-38. In particular:

Ludwig discloses of a fuel cell comprising an MEA in Fig. 3 comprising a first material 82 for conducting protons and a second material 84, organized and arranged in one or more homogenous fields in predetermined locations in the first material which is gas permeable (see col. 9, 11. 33-55 as applied to claims 1 and 33). The microporous nature of the second material is held to be sufficiently capable of conducting CO₂ gas, absent clear evidence to the contrary. Ludwig does not appear to teach, fairly suggest or render obvious the membrane electrolyte as defined in the claims, wherein said second material comprises a web of micromesh and the first material comprises a plurality of strips positioned intermittently along the second material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
